What is CryptofaxPA?

CryptofaxPA © is the new plug-and-play device that turns your old fax machine into an incredible combination of the most recent technologies for digital communication. In just a few seconds.

A compact, portable device, that recharges through a common USB socket, and that can be installed between the telephone socket and the twisted pair of the old appliance.

Characterized by an elegant and minimal design, it fits perfectly in the offices of public managers and employees, as well as in their houses, where the work routine takes place more and more often.

*A Certified E-Mail system used in Italy to raise the legal value of the communication between two entities.

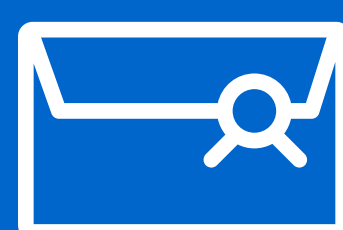

Feature List

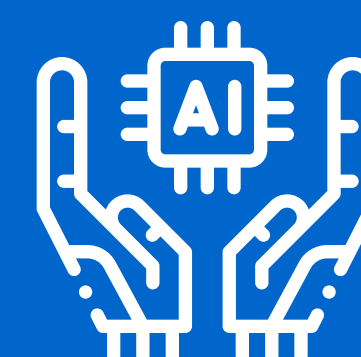

Blockchain based

CryptofaxPA © automatically saves the record of a message sent and received in the distributed-ledger of the Ethereum circuit to ensure both the sender and the receiver on the effectiveness of communication.

PEC Ready

CryptofaxPA © can receive and print certified e-mails automatically: simply connect your account and immediately retrieve have all of your messages on your desk.

AI Powered

CryptofaxPA © uses sophisticated artificial intelligence algorithms to convert physical documents into digital ones, automatically recognizing the author's signature to turn it into a legally valid digital signature.

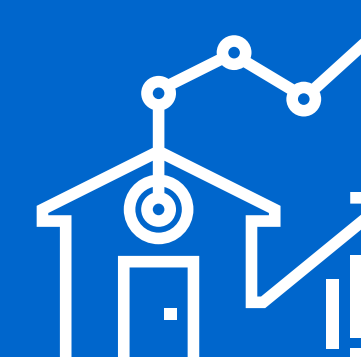

Chatbot

CryptofaxPA © uses the most advanced voice interaction technologies and integrates with the ecosystems of Apple Homekit, Google Home, Amazon Alexa. This will allow you to dictate the certified e-mail text to your favorite personal assistant and to use your fingerprint instead of digital signature.

24 / 7

CryptofaxPA © works 24 hours a day, every day of the week. It has an internal memory to avoid communication interruption, and a battery that allows to stay connected during the long periods of vacation or illness of the owner.

IoT & Home Automation

CryptofaxPA © becomes the hub for managing the home automation systems of your home and office. If you leave home, messages and faxes will be forwarded automatically to your office and your fridge can send you a certified e-mail with the shopping list for your groceries

What early adopters are saying:

“

No need to turn on the computer to print my PEC anymore... It's a revolution!

Mario, Lawyer

”

“

Digital signature costed me a lot of time... Now I don't need it anymore!

Rita, School manager

”

“

Faxes and blockchain: it's like having one huge roll of paper shared with the whole country.

Francesco, Officer

”

“

I just had to plug CryptofaxPA in my phone socket to resuscitate my old fax machine!

Camillo, Personal assistant

”
